DETAILED ACTION

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-42, drawn to a method related to a transaction, classified in class
 705, subclass 26.
- II. Claims 43-51, drawn to a system related to a transaction, classified in class 709, subclass 250.
- III. Claims 52-59, drawn to a computer-readable medium having an executable component related to a transaction, classified in class 717, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, at least one step in the process can be practiced by hand.

Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, at least one of the steps can be practiced by hand.

Art Unit: 3627

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

Because these inventions are distinct for the reasons given above and the search required for any one group is not necessarily required for any other group, restriction for examination purposes as indicated is proper.

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. The specie best depicted by claims 2-12, 43-46, and 52-55 drawn to purchasing a product from a seller computer using a virtual payment account, classified in class 705, subclass 26.
- II. The specie best depicted by claim 13, drawn to purchasing a product from a seller computer upon determining that a buyer will use an alternate payment mechanism, classified in class 705, subclass 52.
- III. The specie best depicted by claims 14-21, 47, and 56 drawn to purchasing a product from a seller computer using a virtual payment account including validation and transmission of authorization, classified in class 705, subclass 18.

- IV. The specie best depicted by claims 22-36, 48-50, and 57-58 drawn to creating a virtual payment account, classified in class 705, subclass 35.
- V. The specie best depicted by claims 37-39, 51, and 59 drawn to settling at least one virtual payment account transaction, classified in class 705, subclass 30.
- VI. The specie best depicted by claim 40, drawn to refunding purchase transaction, classified in class 705, subclass 32.
- VII. The specie best depicted by claims 41-42, drawn to generating a report, classified in class 705, subclass 24.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Application/Control Number: 10/663,443

Art Unit: 3627

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was attempted on 1/23/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to F. Ryan Zeender whose telephone number is (703) 308-8351. The examiner can normally be reached on Monday-Friday, 8am-5pm.
